

**Neil
Griffiths
Training**

Stories can be counted on!

*Using stories as a starting point
for mathematical activities*

This highly practical course will explore the contribution that picture books, stories and rhymes can make to the wider mathematical curriculum.

Aimed at **Early Years** and **Key Stage One** practitioners, this **half-day** session will focus on:

- the use of picture books to introduce and develop mathematical concepts
- how stories can stimulate mathematical thinking
- the use of rhymes to encourage the exploration of number and other areas of mathematics
- practical activities that extend mathematical thinking and encourage a love of the subject.

“At last I realised maths can be fun.”

“I had no idea that stories were so full of mathematical possibilities.”

Duration: **Half day**
